2022 NEW PRODUCTS

H-Series

NEW THERMAL HAND-HELDS

Page 8

With a modern, lightweight design the Thermal Handheld has the ability to hot track targets over 750 meters away. The smooth zoom and real time wifi-to-mobile connection keeps you locked on your target.

C-Series

NEW THERMAL CLIP-ONS

Page 10

Use the Clip-on as a handheld tracker or turn any scope into a thermal scope with a simple attachment. The Clip-on's 4 power zoom and 4 color palettes ensures nothing will make it through your sight picture unnoticed.

SIX Xe

NEW SIX Xe RIFLESCOPES

Page 20

Everything about the Burris SIX Xe was designed for competition and tactical shooting. It's short and lightweight for quicker, easier handling. The 1x is ideal for both-eyes-wide-open target acquisition while the 3-18x56 allows for great flexibility in any situation.

NEW FASTFIRE PRODUCTS

Page 22

Introducing one sight for any weapon platform, any tactical competition, any form of defense, any style of hunting: FastFire. Evolved, refined and advanced for 10 years, with new red dot options, longer battery life, and greater versatility, there's a battle-ready FastFire for every kind of firearm and any kind of shooting.

FASTFIRE IV

FASTFIRE RD

BURRIS TECHNOLOGY

Premium optical glass and top-quality lens coatings ensure that the best image possible is delivered every time you look through a Burris scope. The durable construction and precise, easy-to-use adjustment system gives you the confidence that your Burris scope will perform reliably every time. With the added benefits of being fogproof, waterproof and shockproof, feel secure that your Burris scope will endure whatever Mother Nature throws at you.

PREMIUM OPTICAL QUALITY

Burris uses high-grade optical glass and design prescriptions specifically for each lens inside each scope. Lens prescription tolerances are measured in 1/10,000,000 of an inch. 100% of lenses are inspected multiple times during lens and scope production.

TOP-QUALITY LENS COATINGS

Burris uses anti-reflective and scratch resistant coatings so the best optical glass can perform even better.

Burris Index-Match HiLume™ Multicoating

- Maximizes light transmission for premium image quality
- Minimizes glare for better visibility
- 99.5 to 99.8% light transmission per lens surface

USING HIGH-QUALITY BURRIS LENS COATINGS ON EVERY LENS SURFACE ENSURES THE BEST IMAGE POSSIBLE IS DELIVERED TO YOUR EYE.

Scratch Resistant Coating

- Placed on top of the anti-reflective coating to prevent lens damage
- Extends the life of the scope by preventing dings and scratches

RUGGED CONSTRUCTION

Advanced engineering and attention to detail create rugged, reliable riflescopes that will endure a lifetime of hard use.

6061 T-6 aluminum scope tubes

- 35,000 – 40,000 PSI yield strength
- Corrosion resistant

Solid one-piece tube design

- Machined from a single piece of seamless aluminum tubing
- Lightweight and very strong.

Double Internal Spring System

- Provides nearly double the force of single spring systems to ensure that point of impact will not shift

Precision-gauged, hand-fitted parts

- Perfect fit of internal parts guarantees accurate performance

PRECISION ADJUSTMENT SYSTEM

Every Burris riflescope features a steel-on-steel adjustment system that is positive and repeatable, with audible clicks.

Accurate and positive adjustments

- Precise tolerances ensure that each click moves the point-of-impact the correct amount
- Hardened steel-on-steel designs for long-term performance
- Finger-adjustable clicks are both tactile and audible

Wide variety of shooter and situation specific options

- Low or high profile adjustment knobs
- MOA or Mil increments, dimensionally matched to the reticle
- “M.A.D.” System (Modular Adjustment Dial System) available on premium riflescope lines

HUNT PRODUCT

TRUST US WITH YOUR HUNT.

Finding corners of the world still devoid of a cell signal. The relationships solidified while hanging a trophy deer in camp. The laughter around the campfire as the last flame hangs on. Those familiar with Burris know well what matters. It's about self-reliance. Respect for the game and those you hunt beside. Pushing yourself season after season to be your absolute best. For more than 40 years we've been right there with you, pushing ourselves for the same reasons: We know exactly how much the season means to us, and that's why you can forever trust your hunt to Burris.

HANDHELD

BURRIS
CYBER CORE
FAST. SIMPLE. POWERFUL.

The brand new hand-held thermal series "H" from Burris is the perfect portable thermal camera for professional hunters and offers a selection of three different objective lens sizes (25mm/35mm/50mm). With his 400x300 IR-Sensor and the state-of-the-art 1280x960 HD-Display the "H" series is built for any kind of hunters needs and guarantees a impressive sharp and crystal clear thermal image.

THERMAL HAND-HELDS

With a modern, lightweight design the Thermal Handheld has the ability to hot track targets over 750 yards away. The smooth zoom and real time wifi-to-mobile connection keeps you locked on your target.

NEW BTH25

ITEM NUMBER:
300467

Objective size 25 mm

- 27x20m Field of view on 100 m
- 400x300 thermal sensor for accurate identification
- Zoom Range 1.7 - 6.8

NEW BTH35

ITEM NUMBER:
300468

Objective size 35 mm

- 2.3x to 9.2x zoom range to track targets
- 400x300 thermal sensor for accurate identification
- 35mm f/1.2 focal length for wide field of view

NEW BTH50

ITEM NUMBER:
300469

Objective size 50 mm

- 3.3x to 13.2x zoom range for any range
- 400x300 thermal sensor for accurate identification
- 50mm f/1.2 focal length for extended range

2 YEARS

Burris Thermal Optics Warranty

LASERSCOPE® III

1 OPTIC - 4 TOOLS

PRECISION
OPTIC

DIGITAL
INCLINOMETER

SMART
DOPE CARD

LASER
RANGE FINDER

BALLISTIC[®] LASERSCOPE[®] III

The **Ballistic[®] III LaserScope[™]** is the most innovative and effective hunting riflescope in the world. Combining outstanding optics, pinpoint laser rangefinding, and precision trajectory compensation for the exact ammunition you choose for your hunt, it eliminates most of the variables and guesswork that often cause hunters to go home empty-handed. In one fast sequence the Ballistic III determines the distance to your target, factors in your trajectory and illuminates the perfect holdover. It's that simple.

The Ballistic III significantly extends the range and accuracy of your favorite rifle. No other riflescope combines the level of quality, technology, accuracy, repeatability, speed and effectiveness. It will greatly increase the distance at which you can make an ethical shot.

KEY FEATURES

- **Built-In Laser Rangefinder.** Laser range capability out to 1,100-plus meters with reflective target, 690-plus meters with non-reflective target.
- **Automatic Trajectory Compensation.** Customized trajectory compensation calculates the perfect holdover at your exact distance for your specific cartridge. Trajectory compensation works on any magnification.
- **Integrated Inclinometer.** Integrated inclinometer adjusts for any angle on uphill or downhill shots.
- **Wind Hold-Off.** Scope displays a 16 kmh Wind Value to indicate wind hold-off for your specific cartridge at the indicated range to target. Wind Value represents how many dots to hold into the wind for a 16 kmh crosswind.
- **No Rings Required.** Riflescope comes with its own bases that attach to any Weaver-style or Picatinny base.

EASY PROGRAMMING

Three simple steps:

1. Select Yards or Meters.
2. Enter Drop Number.
3. Enter Ballistic Coefficient.

WINDAGE COMPENSATION

While complete wind compensation is not fully automated within the scope, it gives the shooter the tools needed to make a calculated hold-off estimate. In addition to distance, the scope's digital display will show a 16 kmh Wind Value for your specific cartridge at the indicated range to your target.

www.burrisoptics.eu/en/scopes/laser-riflescopes/ballistic-iii-laserscope-series

Example 300 meters | 16-kmh crosswind
shooter holds .9 dots into the wind

Example 500 meters | 16-kmh crosswind
shooter holds 1.7 dots into the wind

Burris[®] **BALLISTIC III** LASERSCOPE

Two words: no guesswork. It's plug and play in a rangefinding scope that goes even bigger: Just feed the Ballistic III your cartridge's ballistic info and the scope calculates perfect holdover at your exact distance, estimates wind drift, then gives you the bright red dot of accuracy in seconds — all at the push of a button.

BALLISTIC III LASERSCOPE 4-16x50mm

ITEM NUMBER:

200117

RETICLE:

X96 RETICLE

ADJUSTABLE PARALLAX:

50 M TO INFINITY

- Features Remote Cable Switch for convenient operation of On/Range button; expanded ballistic capability accommodates centerfire, rimfire, muzzleloader and slug gun loads
- High magnification extends your long-range shooting capability
- 50 mm objective allows for maximum light transmission
- Strong, low mounting system with its own bases mounts to any Weaver-style or Picatinny base; no rings required
- Reticle displays a 16 kmh Wind Value to indicate wind hold-off for your specific cartridge at the indicated range to target; you estimate the actual wind speed and use the Wind Value as a guide to determine the number of dots to hold into the wind

SERIES FEATURES

- Customized trajectory compensation calculates the perfect holdover at your exact distance; program your cartridge's ballistics information, push a button, and a bright red, illuminated dot signifies your new aiming point in a split second
- Built-in laser rangefinder features 1,100+ meters ranging capability
- Trajectory compensation is accurate at any magnification
- Integrated inclinometer compensates for shots at any uphill or downhill angle

TRIPLE THREAT IN THE WOODS

The Ballistic 4-16x50 (Model #200117) now has enhanced ballistic software that makes it a triple threat in the woods. Not only will it work for centerfire cartridges, but will now work on most rimfire, muzzleloader and slug guns as well.

- High magnification extends your long-range shooting capability
- Ergonomic side focus allows easy-to-reach parallax adjustment

SERIES FEATURES

- State-of-the-art Ballistic Plex E1™ reticle features trajectory compensation out to 500 yards with cascading dots to compensate for crosswinds
- High-grade optical glass provides excellent brightness and clarity with lasting durability
- Quality, precision-ground lenses are larger than those of comparable scopes, for better light transmission
- Index-matched, HiLume™ multicoating aids in low-light performance and glare elimination, increasing your success rate
- Finger-adjustable windage and elevation knobs create a sleek profile; knob indications always reflect a change in the point of impact for pinpoint accuracy

SIMPLE, ACCURATE, EASY TO USE

The Ballistic Plex E1 features a durable etched glass reticle that simplifies the biggest challenges in long-distance shooting: determining holdover at distance and hold-off for wind drift., the hash marks on lower vertical crosshair are calibrated for dead-on aiming from 100 to 500 m. for nearly any big-game hunting cartridge. Cascading dots help you quickly and easily adjust for wind.

AR-SIGNATURE QD™ P.E.P.R.™ MOUNTS

- The new streamlined design with QD mount insures 1/4 MOA re-mount capability and allows for use of back up iron sights while maintaining proper eye-relief. Available in 30-, 34- and 35-mm options with Burris' Signature polymer ring inserts, it provides adjustment from 5 to 40 MOA without using windage/elevation knobs.

Pos-Align® Offset Inserts

XTR SIGNATURE RINGS™

- Provide precision customization of cant to maximize usable elevation adjustment of the scope. Included inserts allow for 5, 10, 15, 20, 25, 30 and 40 MOA of cant
- Provide 100% scope-to-ring contact, eliminating the need to lap rings while providing tremendous gripping power without leaving ring marks
- Strong, lightweight aluminum rings feature solid steel dual screw clamps that insure each ring mounts flat and centered on any Picatinny base
- Includes the following Pos-Align® Offset Inserts: Concentric (Zero MOA), +/-5 MOA, +/-10 MOA, and +/-20 MOA (2 sets)

RING HEIGHTS

1 in.	0.75 in.	1.00 in.	1.25 in.	1.50 in.

1/2-INCH PICATINNY RISER

- Provides 1/2 inch of additional mounting height for optimal sight alignment on tactical platforms

Item	Height	Length
410340	0.5 in.	1.5 in.

SIGNATURE RINGS

- Revolutionary Pos-Align® Inserts technology
- Pos-Align Inserts guarantee perfect centering and maximum scope-to-ring contact for tremendous gripping power without damaging the scope finish
- Lets you virtually sight in your gun without moving the scope adjustments
- Corrects misalignment caused by off-center receiver holes
- Corrects for bases or rings being slightly off-center
- No need for expensive tapered bases or shimming for thousand-yard shooting
- Solid steel rings are ideal for hunting
